Hasan Pekedis

I am a 22-year-old fourth-year Computer Engineering student. I am interested in Java Programming, Machine Learning, and NLP. I have experience in software development, database design, and software design. I closely follow current technology. I am a motivated individual who enjoys learning and researching new topics. I am developing myself to become an engineer who strives to develop innovative solutions to problems. I am a team player who collaborates to achieve success. I have intermediate-level knowledge of computer hardware.

Education

Marmara University — Istanbul, Turkey
Computer Engineering (Faculty of Engineering) — 08/2020 - Present

Relevant Courses: Data Structures, Database Systems, System Programming, Analysis of Algorithms, Operating Systems, Machine Learning, Artificial Intelligence

Experience

Workrunner — Istanbul, Turkey
-Product Software Developer Intern — 05/2023 - 07/2023

- Experienced efficient and user-friendly product development at Workrunner. Gained knowledge in database design and software product development.

Workrunner - Auditrunner — Istanbul, Turkey
-Part Time Product Software Developer — 07/2023 - 07/2024

- Experienced product development projects by directly communicating with customers. Gained knowledge in understanding the needs and preferences of corporate clients. Learned to use JavaScript and its libraries.

Platin Bilisim Teknolojileri — Istanbul, Turkey
-Cybersecurity Analyst Intern — 07/2024 - 09/2024

- Gained detailed experience with SOC-SOAR-SIEM systems. Used Qradar and Wireshark software.

Projects

Turkish NLP (Graduation Project)

- Turkish NLP aims to improve the performance of open-source large language models in Turkish NLP tasks (such as summarization and language generation). Since most open-source language models are trained on English-dominated datasets, this project experiments with different methods and techniques to enhance their performance in Turkish.

University Registration System

- Worked in a 7-person team in an Agile Scrum environment using Java and Python for a university system project. Wrote unit tests and managed tasks on GitHub over three iterations.

Skills & Interests

Technical: Github, HuggingFace, Git, MSSQL, Linux, Docker, Qradar, WireShark, MS Office Applications
Languages: Turkish (Fluent), English (Good - B2), Arabic (Basic)
Programming Languages: Java (Advanced), C (Advanced), Python (Advanced), JavaScript (Advanced)
Frameworks: Spring, Flask, Pytorch, TensorFlow
